Company Profile

Apollo Custom Manufacturing Ltd. is a progressive manufacturing company specializing in the custom manufacturing of Food Trucks, Concession Trailers and Food Carts.

Located in Surrey, British Columbia, we have easy access to the Canada/United States borders which allows for easy shipping or customer pick up from the United States.

Apollo has been manufacturing and shipping products throughout North America and overseas for over 15 years.

Over the past years, we have always been driven to be one of the elite manufacturers in the industry. With constant attention to details and improvements on our products as well as listening to our customer's feedback, we believe we have made our mark but still strive to improve on each unit that leaves our shop.

All fabrication is done in-house with the highest quality of materials. There is no wood used in the manufacturing of Apollo products with the exception of sub floors which are completely covered and sealed from moisture.

We have licensed gas fitters, electricians and fire safety companies on contract. All electrical and gas work is inspected and approved by the B.C. Safety Authority.

Apollo works in a 5,000 sq.ft. manufacturing facility with 6-8 employees.

It is our goal at Apollo Custom Manufacturing Ltd. to continue to offer the highest quality of workmanship and service to our customers. We are always open to any ideas that may improve our product for the end user.
