

## Dometic CoolFreeze meets on-the-go cooling needs

(May 28, 2008) -- Dometic introduces a line of portable compressor refrigerator/freezers.

<< *The 3.77-cubic foot CF110 CoolFreeze portable refrigerator/freezer.*

ELKHART, Ind. - Dometic introduces the CoolFreeze line of portable compressor refrigerator/freezers. Lightweight, compact models hold 23 cans of soda, while larger units hold six full cases of canned drinks. They are composed of high-impact, weather-resistant materials.

The CoolFreeze line includes seven models, ranging from the 0.7-cubic foot CF18 to the 3.77-cubic foot CF110AC. The quick-chill/turbo function runs the Danfoss compressor at maximum performance until the desired temperature has been reached. They can refrigerate or freeze to zero degrees Fahrenheit and have a memory feature that will maintain preset settings if the system is turned off.

A three-stage [battery](#) monitor has a low-voltage shut-off to protect against a dead battery. The

portable units operate quietly and when in inclined positions. The insulation is composed of CFC-free polyurethane foam.
